DETAILED ACTION

Claims 1-8, 10-23, 25-137, 140 and 141 are pending.

Election/Restrictions

1. Newly submitted claim 20 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claim 20 is directed towards the same subject matter as claim 36 that was withdrawn due to being in a non elected Invention.
2. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 20 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
4. Claims 1-8, 10-19, 21-23, 25-35, 140 and 141 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
5. Based on Supreme Court precedent **a method claim must (1) be tied to another statutory class of invention (such as a particular apparatus) or (2) transform underlying**

Art Unit: 3696

subject matter (such as an article or materials) to a different state or thing (see at least *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)). A method claim that fails to meet one of the above requirements is not in compliance with the statutory requirements of 35 U.S.C. 101 for patent eligible subject matter. There are two corollaries to the machine-or-transformation test. First, a mere field-of-use limitation is generally insufficient to render an otherwise ineligible method claim patent- eligible. This means the machine or transformation must impose meaningful limits on the method claim's scope to pass the test. Second, insignificant extra-solution activity will not transform an unpatentable principle into a patentable process. This means reciting a specific machine or a particular transformation of a specific article in an insignificant step, such a data gathering or outputting, is not sufficient to pass the test. Here claims 1-8, 10-19, 21-23, 25-35, 140 and 141 fail to meet the above requirements since there is not a sufficient tie to another statutory class.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-8, 10-19, 21-23 and 25-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled

Art Unit: 3696

in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

8. Claim 1 recites “but not to obtain private information about the account holder without permission of the financial institution that maintains the financial account.”

9. Claim 19 recites “a transaction processing party.”

10. Claim 21 recites “a financial institution that is independent of the transaction processing party.”

11. Claim 21 recites “while excluding all parties except the financial institution in which the financial account is maintained.”

12. These limitations are not disclosed in the Specification of the instant application.

Therefore, the new limitations are considered New Matter.

13. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

14. Claims 21-23, 25-35 and 140-141 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

15. Claim 21 recites "they" in the last sentence.

16. Claim 140 recites “ones” in the sixth sentence.

17. It is unclear who "they" and “ones” is referring to.

Response to Arguments

1. Applicant's arguments with respect to claims 1-8, 10-23, 25-35, 140 and 141 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. D'Agostino, U.S. PG-Pub No. 2002/0120587 (reference B on the attached PTO-892) teaches a method and system for performing secure user account purchases. Card News, "American Express Debut One-Time Use Card Numbers to Cut On-Line Fraud" (reference V on the attached PTO-892), teaches generating a unique number to be used to make a purchase.
